At a minimum, Contractor shall maintain the insurance coverage, limits of coverage and other insurance requirements as described below.

Commercial General Liability (including operations, products and completed operations) \$1,000,000 per occurrence for bodily injury, personal injury and property damage. If coverage is subject to an aggregate limit, that aggregate limit will be twice the occurrence limit, or the general aggregate limit shall apply separately to this project/location.

If Contractor maintains higher limits than the minimums shown above, County shall be entitled to coverage for the higher limits maintained by Contractor.

All such insurance coverage, except professional liability insurance, shall be provided on an “occurrence” basis, rather than a “claims made” basis.

Endorsements: Additional Insureds

The Commercial General Liability and Automobile Liability policies shall include, or be endorsed to include “Tehama County, its elected officials, officers, employees and volunteers” as an additional insured.

The certificate holder shall be “County of Tehama.”

Deductibles and Self-Insured Retentions

Any deductibles or self-insured retentions of \$25,000 or more must be declared to, and approved by, the County. The deductible and/or self-insured retentions will not limit or apply to Contractor’s liability to County and will be the sole responsibility of Contractor.

Alternatively, County may purchase such required insurance coverage, and without further notice to Contractor, County may deduct from sums due to Contractor any premium costs advanced by County for such insurance.

Policy Obligations

Contractor's indemnity and other obligations shall not be limited by the foregoing insurance requirements.

Verification of Coverage

Contractor shall furnish County with original certificates and endorsements effecting coverage required herein. All certificates and endorsements shall be received and approved by the County prior to County signing the agreement and before work commences. However, failure to do so shall not operate as a waiver of these insurance requirements.

The County reserves the right to require complete, certified copies of all required insurance policies, including endorsements affecting the coverage required by these specifications at any time.

Exhibit B

Date: April 21, 2025

Company: Tehama County Probation Department

Street Address: 1840 Walnut St

City, State, Zip: Red Bluff CA 96080

From: World Telecom & Surveillance, Inc. (WT&S)

WT&S is bidding on the following project:

Project Name: Tehama County Juvenile Facility – Detention Electronics Upgrade

Under this proposal, World Telecom & Surveillance Inc. and CTG shall replace and/or upgrade the Detention Security Electronics in the Tehama County Juvenile facility, as detailed herein. WQT&S/CTG shall provide and install the systems and products as detailed below, and includes project management, engineering design and submittals, products, installation, Owner training, and a one-year warranty on all new parts. Additionally, service agreements are available, both for the electronics and the detention doors and locks.

Scope of Work: Detention Electronics Upgrade

Control Room:

The Control Room currently consists of 3 control panels, each in its own cabinet, and each facing the Pod that is controlled by that panel. This necessitates the Control Room operator to be continuously running back and forth to answer calls, open doors, and generally monitor each area separately, which contributes to loss of concentration and focus on any particular situation. To combat these inefficiencies, WT&S/CTG recommends that the 3 consoles be eliminated, and a central horseshoe-shaped console be installed on an elevated platform, with a single touchscreen, intercom master (desk-mounted, with a gooseneck microphone), and a Movement CCTV monitor. The horseshoe design also allows room for a logging computer, radio, paperwork, etc. in a design which accommodates an operator in a swivel chair, with access to the above and still have a visual into the Pods. The cabinetry is not included in this proposal, but our Design/Build team will help with designing the new console, with the County utilizing either their own Carpenter staff or a local cabinetry shop to fabricate and install the product. A back-up control station, with touchscreen, intercom master, and Movement monitor will also be set up at an auxiliary desk in the Control room, which provides redundancy, a location for a second operator to take charge of a particular situation while the primary operator controls the rest of the facility, and for operator training purposes.

Operator Workstations:

The touchscreen workstation allows the operator to control and monitor all of the normal aspects of control room operations, which allows for integration of door control, intercom, paging, and video surveillance in a single, easy to use interface. When an intercom call comes in, the screen quickly switches to that location, the door icon and intercom icon become active, and any cameras associated with that door are automatically displayed. This helps the operator to more quickly identify what's going on and respond to it. The operator interface is displayed on a 27" monitor which is accessed by a

quick touch on the touchscreen, using Dell PC's and non-proprietary detention control software, identical to what is being installed at the **Tehama County Juvenile Facility**

Control System:

The control system consists of a network of industrial controllers, called PLC's or Programmable Logic Controllers. These controllers are an industrial line, made for high-critical applications such as auto plants, water and sewage plants, and nuclear reactors. These are typically featured as having a 20-year Mean-Time-Between-Failures rating of 20 years. Your existing PLC's are a much older line that has not been made in years, and parts availability is becoming a problem. WT&S/CTG will be providing new Modicon PLC's as manufactured by Square D/Schneider Electric, with over a hundred units installed by our companies in detention facilities throughout the West. To keep costs down, we will re-use the existing cabinet racks, power supplies, and relays, plus all field wiring. In addition, we will be installing a remote access PC that is firewalled, to allow a faster response by our service technicians to remotely access the system.

Intercom System:

The existing intercom system is an older analog system, with discrete amplifiers for each of the 3 existing control stations and switching by old commercial quality relays. Under this proposal, WT&S/CTG shall provide a detention-quality microprocessor-based intercom system, as manufactured by Harding Instruments. As a smart system, we can individually adjust the volume for each station and also tune it to help reduce echo effects and soften the slamming sound when the door closes. This results in increased intelligibility and also helps reduce the stress on the control room operator.

CCTV Surveillance System:

The existing CCTV system will need to be upgraded by WT&S/CTG using the Ocularis VMS, and WT&S/CTG will provide an interface between the VMS and the detention control system, to provide automatic and manual call-up by the control system. **The CCTV Software/Storage upgrade is not part of this quote, WT&S/CTG will need more information on the duration of storage that is needed and what is currently on site.**

General Notes:

- 1) Prices Indicated include engineering, submittals, project management, installation and programming labor, parts, freight, air and vehicle costs, per diem, Owner training, and one-year warranty on installation and three-year warranty on parts.
- 2) Does not include suggested cabinetry changes nor their demolition
- 3) Removed materials will become the property of the County
- 4) This proposal is predicated upon the re-use of the existing field devices and associated wiring, which are assumed to be in good, working condition. Any repairs to existing will be repaired on a T&M basis, or on a quoted basis.
- 5) All field devices and wiring shall be re-used, including locks, door position switches, intercom stations, and associated wiring, and are assumed to be in good working order. Any repairs shall be done on a quoted or T&M basis.

6) **WT&S/CTG** engineer, and Project Manager will come to the site at the beginning of the project and will spend time investigating site conditions and equipment. They will then sit down with the Staff and determine if any room names are to be changed, and more importantly, work out how the system will operate, and suggest improvements to make the Control Room operation more efficient. After this meeting, the engineers will design and program the system, assemble it and test it in our office. The County representatives will be invited to the **WT&S/CTG** shop for an Owner's Witnessed Shop Test, where we will run the system through its paces with the staff, and make any necessary changes and improvements. The system will be packaged and shipped to the facility and installed by **WT&S/CTG** field technicians. The system will be commissioned, and the Maintenance Staff will receive training on Level 1 maintenance and the Control Room Staff on operation of the system.

7) The system will have a one-year warranty on the newly installed parts and systems, and the remote access PC will be enabled and Maintenance trained on how to enable it when needed.

8) **This price is currently based upon there being no tariffs in place, and as some of the parts are produced in Canada and Mexico, there will exist the possibility of tariff charges being imposed, and these costs will be forwarded to the County with no mark-ups.**

World Telecom & Surveillance Inc. will install Tehama County Juvenile Facility – Detention Electronics Upgrade, for the cost of Two Hundred Forty-Nine Thousand Nine Hundred Twenty-Five and 35/100 Dollars (\$249,925.35)

These costs include the labor required but does not include anything not mentioned or included in this cost quotation.

Todd, I want to thank you for this opportunity to work with you and show you the professionalism of our staff and the quality of our work. If you have any questions, or need additional information, please feel free to call.

Sincerely,

World Telecom & Surveillance Inc.
