Corning Letter to Extend HHW collection TCSWA 12252025.pdf;

Hi Paul,

Attached is a letter that would extend the HHW collections at the Corning Disposal facility under current terms until August 31, 2025. This would provide the new TCSWMA Manager ample time to acclimate to their new role and come to a long-term solution. TCSWMA did not offer any other possible solutions to meet WM's needs to continue to host the facility. The proposal that WM delivered on Oct 22, 2024, is still valid. WM has extended the agreement under current terms for over 12 months. WM will not extend further. The expectation is that this issue is resolved by Aug 31, 2025.

Thanks,

Diana

Subject: [EXTERNAL] Corning Disposal HHW Facility Agreement

Hi Diana,

I know this is short notice and understand if it cannot be granted, but I would ask that WM provide the Agency with one more extension of the current agreement between the Agency and WM to host our HHW

facility on WM's property. At the time I had requested the last extension I was under the impression the Agency would have hired a permanent Agency Manager by this time. The Agency held interviews for the Agency Manager position on March 17 and is currently in negotiations with the selected candidate, with their employment contract expected to be on the April 7 Full Board agenda. Are you OK with extending the current agreement to August 31, 2025? If you could provide me with the extension by April 25, it will allow me time to place it on the May 1 Executive Committee meeting agenda. I appreciate you working with our Agency.

Thanks,

Paul Freund
